**3D Turn-Based Fantasy RPG 'Time Of Heroes – The Arrival'
Has Begun Its Adventure On The App Store!**

Strategy- & Role-Playing RPG At Its Best!

Independent German-based developer, smuttlewerk interactive, is proud to announce the release of 'Time of Heroes', now available on the App Store, and compatible with the Apple iPhone®, Apple iPod touch®, and the Apple iPad®!

'Time of Heroes' is a 3D turn-based strategy game with heavy roleplaying elements, which, thanks to the groundbreaking combat system, easy accessibility and modern graphics, enables the player to immerse himself for many hours in the fantasy world of 'Altland'.

Under the leadership of prince Minos, humans land on a foreign coast in search of a new home. A short while after going on shore, they realize that the land holds many dangers, but also new hopes and new allies. Their old home was engulfed by ice and cold and the old king Asterios ordered his son Minos and the majority of the people to sail southward. 400 years before the happenings in 'Companions' (available by the developer exclusively for the Apple iPad®) the northern people reach the coast of 'Altland'. Immediately after the landing they make acquaintance with the inhabitants of the north coast, and those strange beings have just one thing in mind: eat all the intruders.

In the course of their adventures the heroes of the northern people meet the mad elf Shoto Gar and his ally, the legendary dwarven trapper, Ung Bulmitz. These two wrongdoers control the lower creatures of the north and without hesitation try to enslave or destroy the newcomers.

Since thousands of years 'Altland' is the scene of a terrible war, which brought the old races of the continent, the dwarves and elves, to near extinction. The minions of the dark god 'Detexx', undead, demons and other horrible creatures turn out to be the biggest threat the humans have ever faced. Prince Minos is quick to realize that the 'hordes of nether' may only be defeated by joining forces with dwarves and elves of 'Altland'.
