**Extreme Rise Of The Triad Coming Soon To
Apple iPhone™ & Apple iPod touch®**

Garland, Texas - February 15, 2010: Apogee Software and Mobila Interactive today announced that Extreme Rise of the Triad™ will be offered as a free update to the recently added App Store title Rise of the Triad™. The Extreme add-on pack contains deviously different tricks, traps and treachery not seen in the original Triad.

"Apogee has always been a company of firsts in the gaming industry" said Terry Nagy, Chief Creative Officer of Apogee. "Other companies would create a gold or platinum package and charge you for the additional content".

Extreme Rise of the Triad has over 40 additional maps with some of the most brain-bending puzzles and devious traps offered in the Triad series.

"The overwhelming response to the Rise of the Triad announcement has had fans wanting more right out of the gate" said Yevgeniy Goyfman, President of Mobila Interactive. "Offering Extreme Rise of the Triad as a free upgrade gives them what they want without having to pay more for it".

Rise of the Triad is now available from the App Store!
