Immerse Yourself In The Glowing Void!

Latest Game By Assyria Game Studio Is Now Available On The App Store

Previously announced Apple iPhone™ and Apple iPod touch® game, The Glowing Void, has just been released to the App Store! The Glowing Void is a simple and highly addicting game where your objective is to create voids!

In this highly unique and entertaining game, it is your goal to fill up at least 70% of the screen with as large circles as possible while avoiding a number of red dots of an unknown entity. The game is made harder because the red dots are dynamic and bounces around all over the display. The control mechanism is highly unique: You touch the screen to begin, avoid the dots at all times, and the longer you keep pressing, the larger the void (circles) become, and the more points you score before letting go! Tilting the device will alter the direction of gravity, allowing the red dots to be trapped by circles or voids already created! If you get hit by a dot, a life is lost, and by completing 70% of the screen you progress to the next level. It's entertaining; it's simple, and it's fun!

In conjunction with the release of The Glowing Void, Assyria Game Studio has just released a game-play video: <http://www.youtube.com/watch?v=1saol92zFhU>

The Glowing Void is available from the App Store here:
