Take Control Of Your Finances With KashBook On Apple iPhone™ & Apple iPod touch®

Intuitive And Effective Financial Planner

In today's economy it has never been more important to keep a close eye on your income and spending. KashBook from Artefacto Estudio does just that! With this app you have the ability to monitor your account(s) status anywhere and everywhere. KashBook allows you to control multiple accounts and allows you to enter your spending in multiple categories including food, home, transportation, utilities, paycheck / income and even allows you to create your own categories. All movement in the categories can be summarized in annual reports allowing you to analyze how much you are spending on each. KashBook gives you complete control over what you wish to see on the screen: the interface can be tailored by totals, by category, date, description and a lot more. You also have options to control which currency should be used for all totals, and even password protect the application from unwanted eyes.

KashBook exists in 3 versions on the App Store: First there is the full version that includes every feature you can possibly imagine. Next, there is an ad-based version which is 100% identical to the paid version, except it's ad-based and thus, at the inconvenience of a little less real-estate on the screen you still get the full application in all its glory! Finally, there is a FREE version available for download which doesn't have any in-app ads, but is limited in functionality and features.

With cool technology such as the Apple iPhone™ comes cool applications such as KashBook, which everyone should use to monitor their daily spending. Visit www.artefactostudio.com for additional information about KashBook and other applications from the developer.
