Double The Balls, Twice The Fun!

Get Ready For Mirror Maze On The Apple iPhone™ & Apple iPod touch®

Mirror your movements in Mirror Maze, a brain-bending maze game coming soon for the Apple iPhone™ and Apple iPod touch® by independent developer, Assyria Game Studio, the same team that brought you the wildly successful "The Glowing Void"; In Mirror Maze, it is your objective to navigate a ball through a maze from the upper-left to the lower-right of the screen. But be careful! All your movements are mirrored to another ball making this game even trickier, and if either ball hits an object, obstacle or wall, it's back to the beginning to try again! With 36 levels that get increasingly more complicated as you progress, you'll always have something to puzzle over in Mirror Maze: The initial mazes remain static, but as you become better at navigating the levels, the mazes become alive! Scattered around the levels are Vortex portals that will teleport either you or your shadow player to a different part of the screen; while green portals teleport the player ball, the red portals teleport the ghost ball. Mirror Maze includes AGON online leader-boards allowing you to upload your scores to compare your achievements with other players; scores that can be shared through Facebook and Twitter.

Journalists interested in receiving an exclusive *preview* of Mirror Maze for the Apple iPhone™ and Apple iPod touch® should make direct contact to Adam Green of Assyria Game Studio (adamgreen@assyria-game.com) and copy press@indiedeveloperconsulting.com on the request!
