## **Irresistible Puppies Ready For Adoption On The Apple iPhone™ & Apple iPod touch®**

**Pet Puppy Has It All: Bones, Steaks, Straw-Hats & Even RC Cars!**

Who can resist the temptation of having their very own cute and cuddly puppy? Puppies are adorable, beautiful, fun, loving and offers even the heartless an oasis of endless joy! From developer Battery Acid Games comes "Pet Puppy", just released on the App Store, compatible with your Apple iPhone™ & Apple iPod touch®.

In Pet Puppy you have the ability to customize your very own puppy, and you are invited to bring along your fluffy friend to Puppy Springs, a luxurious new park made just for the two of you! Feed, play, and accessorize your puppy to keep it healthy, happy, and active. You can earn puppy points by satisfying your friend's needs, giving you the option to purchase new items and activities! If you are a true dog lover then perhaps, if you are caring and loving enough, you will succeed as a dog owner, and assemble the entire collection of available toys and accessories!

In addition to customizing your very own puppy and bringing it to life, you will participate in real-world actions like petting and playing catch! It doesn't get more cutesy and fun; Pet Puppy has a fantastic inventory system for maintaining and using various items in the game. You will also find a general store in which you can purchase not only the best puppy food, but also toys and other accessories. The game has Facebook integration allowing you to share your experience with friends online, and also features an award system for completing various tasks!

Additional information about Pet Puppy and other games by Battery Acid Games is available by visiting [www.batteryacidgames.com](http://www.batteryacidgames.com). Journalists interested in a promo code are encouraged to bark in the direction of [press@indiedeveloperconsulting.com](mailto:press@indiedeveloperconsulting.com).
