Future Fight Invades The App Store, And Targets The Apple iPhone™ & Apple iPod touch®

Battle Driven, Hard-Core Action Game Based On Gender Wars!

Polish game developer Bloober Team has just released Future Fight on the App Store. Future Fight (formerly announced as Gender Wars: The Battle) is a spinoff from the developer's larger project, Gender Wars, currently in development for the Apple iPad. In this visually stunning and high-paced game, the focus of Future Fight is on hardcore action, battles, and features the "Operations Mode", in which players must specialize in tactical management.

Gender Wars for Apple iPad, from which Future Fight derives, is an arcade story-driven tactical game in which each player has the opportunity to pick sides in a post-apocalyptic world in a fight for total domination. Gender Wars takes turn-based gaming to an unheard level with emphasis on performing actions rather than planning them.

Future Fight for Apple iPhone™ and Apple iPod touch® is now available on the App Store here:
