## **Angry Viking Has Invaded The App Store!**

Blood & Guts (By The Gallon) On The Apple iPhone™ & Apple iPod touch®

Danish start-up and Indie developer, Zaxis Games, has just unleashed the Angry Viking on the App Store. In this launch title with gruesome killing, it is your objective to hack 'n' slash your way through villages of innocent peasants and knights! Sharpen your axe, because the Viking is here to stay, angry and hungry for blood. Nor man nor beast shall be left alive!

Zaxis Games have developed "Angry Viking" for the hardcore and mature audience on the App Store. The game brings digital violence to a new level with its mad combo-kills and disgusting slaughtering - and it raises the bar on visual quality and style on the Apple iPhone™ and Apple iPod touch®.

Angry Viking is now available on the App Store from here:
